FOR DUNKIN' DONUTS ONLY

AMERICA RUNS ON DUNKIN'

SUGARING MACHINE FOR CML'S

For fast, even coverage of cake and raised donuts with granulated or powdered sugar

* BELSHAW SUGARING MACHINE

The Sugaring Machine has been designed and tested expressly to be suitable for Dunkin Donuts CML's. It is the ideal method for CML's to apply sugar coatings to donuts of any size or variety. In typical conditions the Sugaring Machine can process upwards of 207 dozen donuts per hour.

Donuts are manually poured from screens onto an extra large downward sloping chute and into the tumbler.

The tumbler spins the sugar and donuts while a spiral rail guides the donuts through the tumbler.

The Sugaring Machine is equipped with two nylon hammers to keep sugar airborne rather than sticking to the tumbler.

Finished donuts receive an approximately even sugar coating, while excess sugar is allowed to drop into a container under the open portion of the tumbler for re-use.

Discharge of donuts can be to into any container, screen or conveyor.

Tumblers are removable. Extra tumblers are available for situations requiring quick changeover of sugar coatings.

DIMENSIONS AND POWER

- Length: 80"
- Width: 28.5"
- Height: 47.5"
- Power: 240V/60/1, 4 Amps
