

DX Eco-touch Deck Ovens

2 to 4 trays wide & 2 to 4 decks high

The DX Modular Deck Ovens are extremely versatile deck ovens. Their modular design makes it ideally suited for installation in bakeries with limited access. Each deck features a heavy sole plate and steam capability, which is ideal for producing a variety of artisan and oven bottom breads.

OVEN FEATURES

- Available in 2 to 4 wide configurations (see next page for baking area dimensions).
- Can be stacked up to 4 decks high
- Independent controls for top and bottom heating elements to create balance of heat
- Single piece, heavy sole plates for evenly distributed bottom heat for traditional oven-bottom baked bread
- Patented Cumulus Steam Generating System
- All decks have a generous 8" crown
- Each deck separately controlled for complete flexibility and energy conservation
- Stainless steel construction throughout
- Safeguard Protection System ensures oven controls never overheat
- Provides a gentle mellow bake each and every time
- Rapid heat recovery rate
- Simple damper facility for expelling air
- Illuminated bake chamber using halogen bulbs with external access
- Generous, thick slabs of rock wool insulation deliver exceptional heat retention
- Modular components- make it suitable for installation in basements or above-ground-level locations
- 2 year parts/labor warranty

ECO-TOUCH SCREEN

- Up to 240 bake programs. Settings can be changed while the program is running.
- Menu interface for fast, easy, and mistake free usage. Icons and illustrations are used for menu selection.
- 7-day timer to start oven at selected times, ready for every shift. 4 events can be programmed for each day of the week.
- Help function at top of every screen
- Sleep mode returns each oven to a selected standby temperature to reduce energy consumption up to 66%
- Auto-shutdown to prevent ovens from being left on by mistake
- Prompts such as "Door Open", "Bake Over", etc can be activated as desired. (Standard alert tones and buzzers are also available)
- Baking programs can be uploaded and downloaded via USB. This includes recipes, sounds and tones, logos, icons, images and software.
