

Open Kettle Donut Fryers (Gas)

CG = Electronic ignition, electronic temp control

FG = Standing pilot ignition, thermostat control

Belshaw open kettle gas fryers are designed to efficiently produce all varieties of cake and yeast raised donuts. Almost any size and shape of donut can be made in these adaptable and dependable fryers.

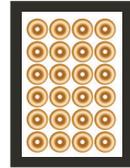

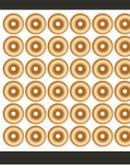

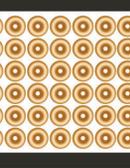

- Gas efficiency is maximized for rapid heating and energy saving. The electronic controller used by CG models keeps temperature within a narrow band, and displays current temperature and set temperature.
- Belshaw's Open Kettle fryer, cake donut depositor, and filtration system are designed to work together. Easy-to-use submerger screens can be added to further improve production efficiency.
- Belshaw provides a full line of companion equipment designed for donut production:
 - Type B or Type F cake donut depositors
 - EZ Melt Filtration system
 - CP Cabinet Proofer (Compatible with 718L & 724 Open Kettle Fryer models)
 - H&I-2 or H&I-4 Icing Tables
 - HG or HGEZ Hand Glazers

VENTILATION, FIRE SUPPRESSION AND MAKEUP AIR

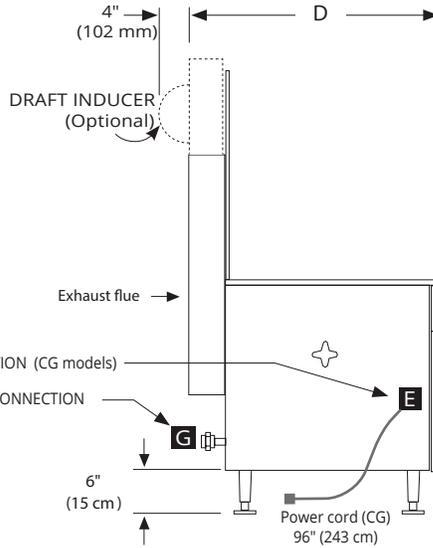

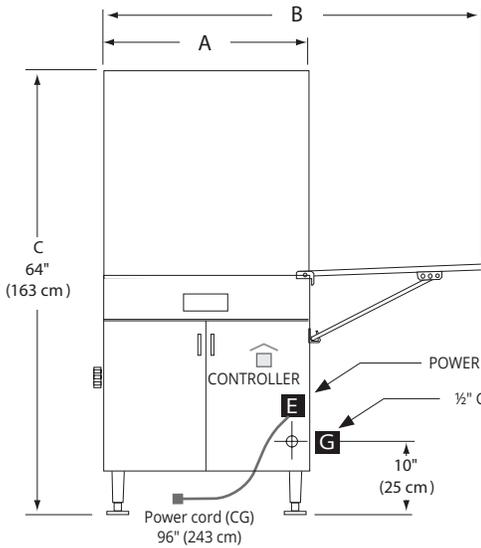

- Customer is responsible for ventilation hood, makeup air, and/or fire suppression as required by local codes.
